

QUALITY MANAGER

We are seeking a full-time Quality Manager to join the Quality Assurance Team in Belleville, IL. The quality manager will perform a variety of projects in the development and implementation of methods and programs to ensure that company product lines meet specifications and standards. Investigate, establish and implement requirements for inspection and testing methods, techniques, equipment and facilities. Determine frequency and allowable variations from specifications at various stages of the manufacturing process. Work with shop supervision and engineering functions. Investigate and recommend alternatives to product designs and manufacturing methods.

Responsibilities

- Extensive Background with Process Control Implementation
- Proven QA Department success through positive team building
- Manage and Administer a (CAPA) corrective and preventative QA system
- Technical experience with internal process and external supplier audit systems
- History with Continuous improvement processes
- Design quality improvement program relevant to manufacturing
- Managerial skills which influence and support others
- Effective verbal and written communication skills
- Proficient with Microsoft office and relate software
- FMEA for new product development

Pluses –

- History of process improvements within a lean business system
- Practical knowledge of ASQ certifications and ISO compliant audit programs
- Experience with Sheet metal processing and assembly

Skills/Qualifications

- Minimum B.S. Quality Science, Mechanical or Industrial Engineering
- Effective research, analytical, and problem solving skills.
- Knowledge of ISO9001 a plus.
- Ability to function effectively within a manufacturing environment.
- Demonstrated PC usage in previous work experience, including Microsoft Office, Excel, PowerPoint, etc.
- Effective verbal and written communications skills. Ability to communicate at all levels of the organization and work within a team structure to support company objectives.
- Ability to work with minimal supervision, take initiative and be confident in independent decision-making.
- Ability to effectively influence and engage others.
- Experience with process improvement and lean business management systems.
